

NEON LED STRIP

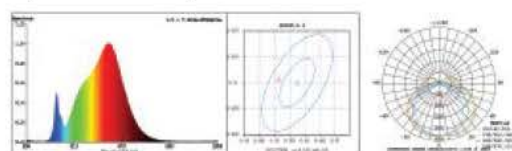

IP67	24Vdc	12 W/m	5 YRS Warranty	1-10V
------	-------	--------	----------------	-------

Material	High quality FPC
Roll	5m
Beam Angle	110°-140°-170°
Input voltage	24Vdc
Color Temperature	2700K,3000K,4000K,6000K
Lamp	LED
Lumen	890lm/m
CRI	≥80
Ambient Temp.	-20°C ~ 50°C

Installation accessories set (PC mounting clips, screws)

Optional accessories

Image	Description
	Aluminum Profile L2000*50*10 140 02mm L2000
	PC type 10mm mounting profile
	Cable grommets set (front & end cap, power cord)

Product Features

IP67 fully encapsulated, flexible LED strip for linear outdoor and indoor, LED circuit completely encapsulated with UV silicone sheath.

DMX controlled LED strip use special IC chip to address each section of LEDs to be programmed to the users preference and compatible with DMX512 protocol. Allows to create millions of colors by mixing red, green and blue colors.

- High quality FPC
- Self-encapsulated LED
- Light source lifetime:50K hours
- Light source removable
- Meets (EU) 2019/2020 ERP regulations
- Horizontal bending
- High quality silicone material
- Min.Bending Diameter:Φ140mm
- Single-ended power supply maximum length:10m
